Solution: Those solids which have intermediate conductivities ranging from 10^{-6} to 10^4 ohm⁻¹ m⁻¹ are classified as semiconductors. As the temperature rises, there is a rise in conductivity value because electrons from the valence band jump to conduction band.

In an essay that argues for a cause, you can

talk about what created the problem and then discuss some possible solutions at the end of the essay, but in a Problem Solution essay, you get to spend a lot of time talking about the details of the solution and arguing for why that solution is the best, most efficient, and most feasible.
